

TRUE PRIVACY WITH REAL PROTECTION

One by Labb

Drug-testing compliance and case management — in one platform.

For treatment programs, corrections agencies, drug courts, probation departments, and the collection sites that serve them.

WHAT THE PLATFORM DOES

One system, end to end.

Every step of a testing program — intake, selection, collection, results, and reporting — handled in one place.

● Random Drug Testing

A court-defensible random draw with timestamp and seed. Rapid oral-fluid and urine screens plus lab confirmation, with configurable panels per program.

● At-Home Proctored Testing

Participants self-administer a mailed kit on their own phone — no app to install. Selfie, government-ID capture, face match, and a liveness check confirm identity; AI-assisted strip reading returns a per-analyte result.

● Secure Video Sessions

Self-hosted, encrypted video meetings with one-tap SMS or email invitations. Optional recording with automatic transcription for documentation.

● Clinic & Treatment Portal

A dedicated workspace for collection sites and treatment partners: roster, result posting, contract management, and electronic BAA acceptance — isolated from your staff accounts.

● Compliance & Privacy

HIPAA-aligned safeguards and 42 CFR Part 2 consent. Encrypted in transit and at rest, role-based access, multi-factor sign-in, and a complete, timestamped audit log.

● Integrations & API

A stable REST API, signed webhooks, and single sign-on (OpenID Connect or SAML). Streaming bulk CSV exports for state-system and lab reconciliation.

HOW IT WORKS

From enrollment to court-ready records.

1

Enroll participants

Add cases by hand, bulk-import a roster, or sync from your existing system through the API.

2

Set the rules

Choose testing frequency, weighted pools by risk or supervision type, panels, and exclusion rules — per program.

3

The platform selects and notifies

A random draw selects participants and texts them automatically. No phone calls, no paper requisitions.

4

Results and reports flow back

Rapid, lab, and at-home results post in real time. Compliance and chain-of-custody reports generate themselves.

HIPAA-aligned · 42 CFR Part 2 consent · Encrypted end-to-end · Fully audit-logged

See it on your own caseload.

Request a walkthrough — setup takes minutes, not days.
